

**Commercial Pest Control Services
 Price Guide (from April 2018)**

Pest Management - Call-Out Services

For those customers who do not require the year round cover provided by a pest management contract with us, we provide good value one-off treatments for all pest types. Typical treatments for rats, mice, squirrels and fleas cost £140.00, ants £91.39 and wasps £46.00 (all prices exc VAT). For further peace of mind consider a pest management contract.

Pest Management Contracts

The prices shown below are a guide to the annual price of a pest management contract with Wakefield Council's Pest Control Service for the following standard service:

- Six contract service visits per year by our fully trained and NPTA accredited pest control officers.
- Free call-outs for professional advice and treatment / eradication of the pests included in the contract.
- Contract Service Log – to provide a written record of the service visits and treatments undertaken (essential for Due Diligence and customer audits).
- Electronic fly-killers, fly screens, bird-proofing and other pest management service available at discounted rates.
- All Pest Control Officers Wildlife Aware trained and treatments fully compliant with the Code for Responsible Rodenticide Use (CRRU).
- Access to the wider Environmental Health services so that off-site pest and other environmental problems can be dealt with.

The contract specification can be tailored to suit your particular needs.

Contract Price Guide (exc VAT)					
Size of premises:		Small / Medium		Large	
Risk of Pest Problems:		Low	High	Low	High
Pests Covered	Rats & Mice	£186	£238	£305	£494
	Rats, Mice and Insects	£280	£326	£396	£587

Further Guidance / Definitions

Small / Medium Premises: typical high street shops, take-aways and restaurants, school kitchens, offices, small industrial units and domestic premises.

Large Premises: warehouses, manufacturing premises, hotels, waste recycling facilities, whole school premises, larger office blocks, leisure centres and swimming pools.

High Risk: where open food is prepared, consumed or stored; or where waste is handled or processed as an integral use of the premises. Typical examples include take-aways, restaurants, food manufacturers, waste transfer stations.

Low Risk: Premises that are not high risk because they are not used for the preparation etc of food or waste. Examples include shops which only sell wrapped or packaged food, non-food retail, non-food manufacturing, warehousing or leisure complexes.

Rats & Mice: includes treatment of rats and mice inside buildings and rats outside in the grounds of the premises.

Insects: includes cockroaches, bedbugs, fleas, ants, and similar infestations of crawling insects inside premises and wasp nests inside and outside (but within the grounds) of the premises. Wood boring insects are not included.
