

Adult Social Care Outcomes Framework (ASCOF)

The ASCOF is one of the tools we use to measure our performance. The Framework demonstrates how well care and support services achieve the outcomes that matter most to people. The measures are grouped into four domains which are typically reviewed in terms of movement over time. Data is provided at council, regional and national level.

Our results from 2018-19 are shown below, along with the previous year's results and how we compare against other Councils.
